

ABUBAKRI FAARUQ ADEBOWALE

IT Administrator | Network Engineer | Cybersecurity Specialist | Cloud Engineer | Software Developer

Lagos, Nigeria

Phone: +234 906 134 5507

Email: faruqsuzay@gmail.com

GitHub: github.com/IbnAbubakri

Portfolio: abubakrifaaruaqadebowale.vercel.app

PROFESSIONAL SUMMARY

IT Administrator, Network Engineer, Cybersecurity Specialist, Cloud Engineer, and Software Developer with **5+ years of hands-on experience** in IT infrastructure, enterprise networking, cybersecurity, cloud computing, systems administration, and full-stack software development.

Experienced in administering **Windows and Linux environments, Active Directory, firewalls, VPNs, backup and disaster recovery systems, network infrastructure, and AWS cloud services**. Strong networking background in **Cisco routing and switching, TCP/IP, IPv4/IPv6, VLANs, 802.1Q trunking, inter-VLAN routing, OSPF, EIGRP, IP addressing, subnetting, network security, and troubleshooting**.

Full-stack software development experience using **React, Next.js, TypeScript, JavaScript, Python, FastAPI, Node.js, PostgreSQL, MongoDB, Supabase, REST APIs, Docker, Git, GitHub, and CI/CD**. Experienced in AI-assisted software development and rapid application prototyping, development, testing, security implementation, and deployment.

Technical instructor with experience training and mentoring **200+ students** in networking, IT infrastructure, and professional certification preparation through practical, hands-on laboratory environments.

Currently pursuing a **Bachelor of Science in Cyber Security at the National Open University of Nigeria**, with academic focus on penetration testing, digital forensics, Security Operations Center (SOC) operations, risk management, ISO 27001, and NIST cybersecurity frameworks.

CORE COMPETENCIES

- IT Infrastructure Management
- Network Administration

- Network Engineering
- Systems Administration
- Cybersecurity
- Network Security
- Cloud Computing
- AWS Cloud Infrastructure
- Software Development
- Full-Stack Development
- AI-Assisted Development
- Active Directory
- Firewall Administration
- VPN Configuration
- Backup and Disaster Recovery
- Cisco Routing and Switching
- VLANs and Inter-VLAN Routing
- OSPF and EIGRP
- Network Troubleshooting
- Linux Administration
- Windows Administration
- Penetration Testing
- Security Monitoring
- SOC Operations
- Risk Assessment
- Docker and Containerization
- CI/CD
- Git and GitHub
- REST API Development
- Database Management
- Technical Support
- IT Training and Mentorship

PROFESSIONAL EXPERIENCE

HIIT PLC

CompTIA Network+ and A+ Instructor

Lagos, Nigeria | Current

- Deliver instructor-led training covering **CompTIA Network+, CompTIA A+, networking fundamentals, IT infrastructure, system administration, and technical troubleshooting.**
- Train and mentor **200+ students** preparing for professional IT and networking certifications.

- Design and deliver practical networking laboratories covering **IP addressing, subnetting, VLANs, 802.1Q trunking, inter-VLAN routing, routing protocols, switching, and network troubleshooting.**
- Develop enterprise networking simulations using **Cisco Packet Tracer and GNS3.**
- Teach configuration and troubleshooting of **Cisco routers, switches, VLANs, routing protocols, and network services.**
- Explain complex networking and IT concepts through practical demonstrations, real-world scenarios, and structured laboratory exercises.
- Guide students through network configuration, troubleshooting, documentation, and technical problem-solving.
- Develop training materials and hands-on laboratory exercises aligned with networking and IT infrastructure requirements.

1791 LLC

IT Administrator

2024 – 2026

- Managed enterprise IT infrastructure supporting critical business operations and maintaining approximately **99.9% availability across critical services.**
 - Administered **Microsoft Active Directory**, including user accounts, permissions, authentication, and access management.
 - Configured and maintained **firewall policies and network security controls** to protect enterprise systems and network resources.
 - Managed **VPN tunnels and secure remote-access connectivity** between business environments.
 - Implemented and maintained **backup and disaster recovery procedures** supporting business continuity.
 - Supported migration of enterprise workloads and services to **AWS cloud infrastructure.**
 - Worked with AWS services including **Amazon EC2, Amazon S3, Amazon VPC, AWS IAM, and other cloud infrastructure components.**
 - Monitored IT infrastructure and investigated **system, network, connectivity, and application issues.**
 - Performed technical troubleshooting across **Windows and Linux environments.**
 - Supported enterprise servers, endpoints, network infrastructure, and business applications.
 - Assisted with infrastructure security, access management, availability, and operational continuity.
 - Maintained technical documentation covering infrastructure configurations, troubleshooting procedures, and operational processes.
 - Supported infrastructure improvements aimed at increasing **reliability, security, performance, and operational efficiency.**
-

SOFTWARE DEVELOPMENT PROJECTS

BillXpress — Full-Stack Fintech Platform

Technologies: Next.js, React, TypeScript, Node.js, PostgreSQL, JWT, TOTP/MFA, CSRF Protection

- Designed and developed a full-stack fintech platform supporting **airtime, data bundles, electricity payments, TV subscriptions, wallet management, and transaction tracking.**
- Developed secure authentication and authorization workflows using **JWT-based authentication.**
- Implemented **multi-factor authentication (MFA) using TOTP.**
- Implemented security controls including **CSRF protection, account lockout, and secure authentication mechanisms.**
- Developed wallet and transaction management functionality.
- Implemented real-time balance and transaction updates.
- Designed database-backed workflows for users, transactions, and financial operations.
- Applied secure software development principles throughout the application lifecycle.

Vault — Secure Authentication System

Technologies: Next.js, React, Node.js, JWT, MFA, Email Verification, Rate Limiting, Structured Logging

- Developed a production-oriented **authentication and identity management system.**
- Implemented **JWT token rotation and secure session management.**
- Developed multi-factor authentication functionality.
- Implemented **email verification and password reset workflows.**
- Added rate limiting to protect authentication endpoints against excessive requests.
- Implemented account protection mechanisms for suspicious authentication activity.
- Added structured logging for authentication and security-related events.
- Designed authentication, authorization, session management, and account recovery workflows using security-focused development practices.

FlowDesk AI — WhatsApp Business OS

Technologies: Next.js, React, FastAPI, Python, Gemini AI

- Designed and developed an **AI-powered business communication and WhatsApp management platform.**
- Built the frontend dashboard using **Next.js and React.**
- Developed backend APIs and services using **Python and FastAPI.**
- Integrated **Gemini AI** for intelligent automated responses.
- Designed AI-assisted workflows for customer communication and business messaging.

- Applied full-stack development practices across frontend development, backend services, API integration, and deployment.

Enterprise Networking Infrastructure Labs

Technologies: Cisco Packet Tracer, GNS3, Cisco IOS, Wireshark

- Designed and configured enterprise network topologies using **Cisco routers and switches**.
- Implemented **VLAN segmentation** for departmental network isolation.
- Configured **802.1Q trunking and inter-VLAN routing**.
- Configured Layer 3 switching and **Switched Virtual Interfaces (SVIs)**.
- Implemented dynamic routing protocols including **OSPF and EIGRP**.
- Configured IP addressing, subnetting, routing, switching, DHCP, and network services.
- Designed redundant and failover-oriented network scenarios.
- Used **Wireshark** and network simulation environments for traffic analysis and troubleshooting.
- Practiced network security, infrastructure troubleshooting, and enterprise network design.

QuizApp

Technologies: React, Supabase

- Developed a web-based **quiz and assessment platform**.
- Implemented automated quiz grading and scoring.
- Used **Supabase RPC** for server-side grading functionality.
- Designed structured quiz, assessment, and user workflows.
- Developed a responsive interface for interactive assessments.

Weather Forecast Application

Technologies: React, JavaScript, REST APIs

- Developed a web application integrating external **REST APIs** for real-time weather information.
- Implemented API integration, client-side data handling, and dynamic data presentation.
- Built a responsive user interface for displaying weather conditions and related information.

Scientific Calculator

Technologies: React, JavaScript

- Developed a scientific calculator supporting **40+ mathematical operations**.
- Implemented keyboard-driven input and interactive calculation functionality.
- Designed reusable application logic for mathematical operations.

- Developed a responsive interface optimized for desktop and keyboard-based use.
-

TECHNICAL SKILLS

Networking

Cisco Networking, CCNA, CompTIA Network+, TCP/IP, IPv4, IPv6, IP Addressing, Subnetting, VLANs, 802.1Q Trunking, Inter-VLAN Routing, Layer 3 Switching, Routing and Switching, OSPF, EIGRP, DHCP, Network Troubleshooting, Network Security, Network Design

Cybersecurity

Cybersecurity Fundamentals, Network Security, Firewall Configuration, Penetration Testing, Risk Assessment, Authentication, Authorization, Multi-Factor Authentication, Security Monitoring, SOC Operations, Incident Response Concepts, Digital Forensics, Security Protocols, ISO 27001, NIST Cybersecurity Framework

Cloud Computing

AWS, Amazon EC2, Amazon S3, AWS Lambda, Amazon VPC, AWS IAM, Cloud Architecture, Cloud Security, Cloud Infrastructure, Cloud Migration

Software Development

Full-Stack Development, Software Engineering, AI-Assisted Development, React, Next.js, TypeScript, JavaScript, Python, FastAPI, Node.js, REST APIs, API Integration, Secure Application Development, Authentication Systems

Databases

PostgreSQL, MongoDB, Supabase, Database Design, Database Integration

DevOps

Docker, CI/CD, Git, GitHub, Containerization, Deployment Automation, Infrastructure as Code, Linux Containers

Systems Administration

Windows Administration, Linux Administration, Ubuntu, CentOS, Active Directory, User and Access Management, System Administration, Backup and Disaster Recovery, Shell Scripting, Infrastructure Monitoring

Tools and Platforms

Cisco Packet Tracer, GNS3, Wireshark, AWS Console, GitHub, Docker, Linux, Windows

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
 - CompTIA Network+
 - CompTIA A+
 - AWS Cloud Computing
 - DevOps Certification
-

EDUCATION

National Open University of Nigeria

Bachelor of Science (BSc), Cyber Security

Currently Pursuing

Relevant Coursework:

- Cybersecurity
 - Penetration Testing
 - Digital Forensics
 - Security Operations Center (SOC) Operations
 - Information Security
 - Risk Management
 - ISO 27001
 - NIST Cybersecurity Framework
 - Security and Compliance
-

PROFESSIONAL ACHIEVEMENTS

- Trained and mentored **200+ students** in networking, IT infrastructure, and professional certification programs.
 - Developed **50+ technical projects and laboratory environments** across networking, cybersecurity, cloud computing, software development, and IT infrastructure.
 - Developed and deployed **10+ software applications** using modern full-stack development and deployment technologies.
 - Served **30+ clients** across enterprise, education, technical, and freelance engagements.
 - Supported approximately **99.9% availability across critical enterprise IT services**.
 - Combined expertise across **IT administration, network engineering, cybersecurity, cloud infrastructure, software development, and AI-assisted development**.
-
