Professional Summary

Results-driven IT Professional, Network Engineer, CompTIA Network+ Instructor, IT Administrator, Full-Stack Developer, and aspiring Cybersecurity Specialist with proven expertise in enterprise networking, cloud computing, cybersecurity, technical support, and software development. Certified in CCNA, CompTIA Network+, and AWS Cloud Computing with hands-on experience designing, deploying, securing, and troubleshooting enterprise-grade infrastructures. Skilled in routing and switching, cloud platforms, IT administration, technical training, frontend/backend development, and project deployment. Demonstrated success in delivering scalable IT solutions, mentoring future IT professionals, and building modern web applications while actively pursuing advanced cybersecurity education.

Key Skills

- Network Administration
 - Routing & Switching
 - VLANs, OSPF, EIGRP, NAT, DHCP, DNS
 - Network Security (ACLs, SSH, WPA2, Port Security)
 - AWS Cloud Computing (EC2, S3, IAM, VPC)
 - Linux Administration
 - IT Support & System Administration
 - Cybersecurity Fundamentals
 - Security Operations & Risk Awareness
 - Technical Training & Documentation
 - Cisco Packet Tracer, GNS3, Wireshark
 - Git/GitHub
 - Frontend & Backend Development
 - Full-Stack Project Deployment
-

Certifications

- Cisco Certified Network Associate (CCNA) Training Certificate – Distinction | HIIT Plc, Ikeja | May 2024
 - CompTIA Network+ Training Certificate – Distinction | HIIT Plc, Ikeja | Apr 2024
 - AWS Cloud Computing Certificate | ALX Africa | 2025
-

Professional Experience

IT Administrator

1791 LLC (Remote) | Jul 2024 – Present

- Administer enterprise IT systems, ensuring 99.9% operational uptime
- Manage system access control, user onboarding, and endpoint provisioning
- Implement cybersecurity controls to protect organizational assets
- Deliver tier 1 and tier 2 technical support to distributed teams
- Maintain IT documentation, standard operating procedures, and compliance workflows
- Optimize IT operations for scalability, reliability, and efficiency

CompTIA Network+ Instructor

HIIT Plc, Ikeja | Nov 2025 – Present

- Deliver CompTIA Network+ certification training aligned with industry standards
- Teach networking concepts including routing, switching, subnetting, security, and troubleshooting
- Develop structured lesson plans, practical labs, and certification assessments
- Mentor students toward successful IT certification and career readiness
- Facilitate hands-on technical labs using Cisco Packet Tracer and GNS3

Freelance Network Engineer

Samterk Computer (Remote) | Jan 2024 – Aug 2025

- Designed and deployed enterprise office networks using VLANs, NAT, DHCP, and subnetting
- Configured OSPF and EIGRP for dynamic routing and failover optimization
- Implemented network security controls including ACLs, SSH, and wireless protection
- Built highly available infrastructures with HSRP, STP, and EtherChannel
- Delivered secure remote access and optimized organizational connectivity

ICT & Mathematics Tutor (Part-Time)

Fazl-Omar Secondary School, Lagos | Sep 2023 – Jul 2025

- Delivered ICT and mathematics instruction with practical technical demonstrations
- Simplified networking and digital literacy concepts for students
- Supported academic growth through structured lesson delivery and mentorship

Coding Trainee (Software Development Program)

Benjamin Hub | Jul 2022 – May 2023

- Completed practical software engineering and coding development program
- Built hands-on projects in frontend and backend development
- Strengthened software engineering, logical reasoning, and problem-solving skills
- Developed technical foundations for future fintech, healthcare, and web-based solutions

Customer Experience Specialist

Lakesin Automobile Ltd, Abeokuta | Oct 2018 – Dec 2019

- Delivered technical customer support and onboarding assistance
 - Developed support documentation and troubleshooting guides
 - Improved customer communication and operational efficiency
-

Technical Projects

FinTech Application (BillXpress) | Full-Stack Development | In Progress

- Designed and developed scalable fintech platform for digital payment services
- Built frontend and backend infrastructures for secure financial transactions
- Applied full-stack engineering, API development, and deployment strategies
- GitHub Frontend: <https://github.com/IbnAbubakri/billxpress-frontend.git>
- GitHub Backend: <https://github.com/IbnAbubakri/billxpress-Backend.git>

Weather Forecast Application | Frontend Development | Live Deployment

- Developed and deployed weather forecasting web application with live API integration
- Built responsive user interfaces and optimized user experience
- Live Demo: <https://weatherbyibnabubakri.netlify.app/>
- GitHub: <https://github.com/IbnAbubakri/WeatherForecast.git>

Hospital Management System | Frontend Development | In Progress

- Designed scalable hospital management platform frontend
- Developed healthcare workflow interfaces for operational management
- Live Demo: <https://hospital-system-management.onrender.com/>

- GitHub: <https://github.com/IbnAbubakri/Hospital-System-Management.git>

Enterprise Networking Labs

- Built enterprise-grade VLAN infrastructures
 - Configured dynamic routing protocols
 - Applied network security controls
 - Implemented redundancy, failover, and troubleshooting systems
 - Developed practical Packet Tracer and GNS3 simulations
-

Education

- BSc Cyber Security | National Open University of Nigeria | Jan 2026 – Present
 - Network Administration (Cisco Track) | Penco CyberSchool, Lagos | Feb 2022 – Nov 2023
-

Achievements

- Distinction Graduate in CCNA and CompTIA Network+
 - CompTIA Network+ Instructor at HIIT Plc
 - IT Administrator managing enterprise systems remotely
 - Designed technical labs adopted by networking students
 - Expanded expertise into cloud engineering, cybersecurity, and software development
 - Built and deployed multiple software applications
-

Languages

- English (Professional Proficiency)
 - Yoruba (Native)
-

Tools & Platforms

- Cisco Packet Tracer
- GNS3
- Wireshark
- AWS Cloud Platform

- Linux CLI
 - Git/GitHub
 - Netlify
 - Render
 - Microsoft Office Suite
-

Work Readiness

- Available for Remote, Hybrid, or On-Site Roles
- Open to positions in Network Engineering, IT Administration, Cloud Computing, Technical Support, Cybersecurity, DevOps, and Software Development
- Equipped with professional remote work infrastructure including reliable internet and dedicated workspace
